

Drawback.NET 2012 System Pricing & Specification Sheet

Effective January 2012

Drawback.NET 2012 System pricing is as follows:

*Includes: System software, users manual, online training.

Additional: MS-SQL Server (mandatory), on-site training, consulting, maintenance/support program

LITE Single-user is priced at \$15,000 plus the cost for the *MS SQL Standard Server 2008

Standard Single-user is priced at \$20,000 plus SQL

LITE Multi-user is priced at \$25,000 plus SQL

Standard Multi-user is priced at \$30,000 plus SQL

The LITE Versions are limited in the types of drawback one can process. LITE Versions allow low to high and explicit direct ID simple accounting methods, whereas the Standard Versions will allow for most any type of drawback processing (except Petroleum Producibility). Standard Versions allow true FIFO & LIFO methods with domestic input processing as well as relative values, used-in less valuable waste, complex bills of materials.

Maintenance/Support is available for \$300 per month for the first user and \$220 per month for each additional user requesting support.

On-line training is available at the rate of \$300 per hour.

* Microsoft SQL Server Standard 2008 is required to operate the Drawback.NET 2012 System.

Dutycalc Supplied Materials & Services

Drawback Software

Capabilities of capturing and maintaining databases of imports and exports, tables of manufacturing data and drawback usage. The software will perform and provide reports necessary to validate claims for drawback plus various supplemental management and historical reports.
